Sarah,

See below. I will bring up these questions tomorrow during a meeting with Superfund. Can it wait until the afternoon?

Hi –
I had a call from the Mayor today. He has several questions. Please let me know if we can answer within OPA or if I (or maybe Ben) should reach out to SUPF. I can also arrange a conference call if that would be an easier way to respond. He asked for a turn-around in a day or so.
Thanks - Sarah

1. What is the expected time frame for the final ROD?
[Will ask Superfund in a meeting I have scheduled tomorrow. Could use this answer for other purposes.]
2. When is information on the construction of the isolation barrier expected to come out – what are we doing to prepare for bad odors that will accompany the construction?
[Will ask Superfund in a meeting I have scheduled tomorrow. Could use this answer for other purposes.]
3. Is the Airport involved in discussions on the isolation barrier construction as it is within a certain distance to the runway?
[Yes, they have been consulted. The bird strike mitigation efforts are critical to a successful construction effort for the isolation barrier.]
4. 1st Responders meeting this morning – his fire chief Don Hood participates and learned this morning that the Pattonville Fire Chief will be putting a report out on emergency response – do we know anything about this?
[Need to confirm with Superfund what specifically the report will be. EPA has worked closely with the Pattonville Fire Department on emergency response protocols. Will ask during my meeting tomorrow.]
